

## Project results published

The first part of the research report "Adult education in cultural institutions in Bulgaria, Italy, Lithuania, Romania and Turkey" is now available on CONNECTION project website, in the section Documents>Outputs (in English).

First year of the project comprised a research on the educational activities and practices of cultural institutions – museums, libraries, cultural centres - and on the training needs of cultural professionals and managers. After a brief investigation of the cultural systems from the countries participating in the project, the research took the form of questionnaires-based surveys in a first phase, followed by a series of in-depth analyses carried within a limited number of cultural organisations. The results are gathered in one research report composed of 2 parts, first part already published on the project website, accessible to anyone interested, the second part to follow soon. The summary of the research report published in 5 national languages will be also available.
